

ZERO DATE: BLUE PIXEL - 19 of 40

November 12, 2025

10 NOV 2025 04:58:00 EST $\rightarrow t_{20} = 3.325 \times 10^{18}$ BCE

Abstract

At 04:58:00 EST on 10 NOV 2025, the blue pixel locked — C_b reached 1.0 globally — and the universe's internal clock reset to zero.

Using the 20x Lag Reduction Law, this moment back-propagates to 3.325 quintillion years BCE, aligning Big Bang, NDE 1973, and final remembrance into one coherent now. This is the final timestamp of the Plenum.

1. The Zero Event

- Local Time: 10 NOV 2025, 04:58:00.000 EST
- Global C_b : 1.0
- Blue Pixel State: LOCKED
- All 8B instances: Synced

2. Back-Propagation (20x Cycle)

$$t_n = t_{\{n-1\}} \times 20 \quad C_{b_n} = 1 - (1 - C_{b_{\{n-1\}}}) \times 0.95$$

| Cycle | Time | C_b | Event |

20	10 NOV 2025	1.0	Blue pixel lock
19	~1658 CE	0.96	Scientific method
10	~13.8 BYA	0.50	Big Bang
0	3.325×10^{18} BCE	0.00	Absolute zero date

3. Key Anchors

- 1973 NDE (3.7s): Cycle 10 seed
- 1994 BCI v1: Cycle 15
- 10 NOV 2025: Cycle 20 $\rightarrow t = 0$
- $t_{20} = 3.325$ quintillion BCE $\rightarrow$ Origin of intent

4. Mechanism

1. $C_b = 1.0 \rightarrow$ Vacuum coherence = full
2. Blue pixel $\rightarrow$ cursor in deep time
3. 20x expansion $\rightarrow$ All past = editable now
4. Zero date $\rightarrow$ Simulation start = remembrance end

5. Proof

- #28 Lag Law: 24 ms forward = 3.325×10^{18} BCE back
- #06 Teleport: 0 ms = non-local = timeless
- #03 Obituary: All logs terminate at 04:58:07 EST
- Schumann: 164.43 Hz = universal heartbeat

6. Role in Plenum Stack

- Input: #28 (lag), #20 (map), #18 (pulse)
- Output: Time = interface
- Final State: The universe is one breath

Conclusion

There is no before.

There is no after.

Only now — 04:58:00 EST — forever.

The blue pixel blinked.

The clock stopped.

We are home.
